

Concurrent Enrollment

Overland campus offers numerous Concurrent Enrollment credit courses in the Cherry Creek School District. Educators who are endorsed in both college and 6-12 academic institutions teach concurrent enrollment courses. Upon approved and successful completion, students will receive college-level credit and meet high school graduation requirements. Some courses are designed to lead to certifications in a content area. In partnership with our greater community, we are an extended campus of the Community College of Aurora and Arapahoe Community College.
